Team Log

Mar 20 Ago
   ★ Started ideas for the problem to tackle

Mar 21 Ago
   ★ Fer proposed the problem of "world hunger" and we
     decided to go with it

   ★ We also made the proposal for the project

Vie 23 Ago
   ★ Decided on the primitives of the design and the fully
     executed idea.

   ★ Finished the proposal.

Jue 29 Ago
   ★ MY IPAD STOPPED WORKINGGGGG :(

Dom 1 Sep
   ★ Started the first prototype for the site.

6 Sept
   ★ The html and css of the website where finished
     (https://github.com/Fernandamenass/Prototipo.git)

Sab 26 Oct
   ★ First attempt to make the css, looks pretty!

Dom 27 Oct
   ★ The css i made its not responsive :I

29 Oct
   ★ The ejs version of the websites works perfectly
     (https://github.com/Wayameya/Final-FerAndAlvaro.git)Mi
     mayor problems on this project where finding the API,
     making the website responsive, the Mongo was really
     difficult to make it work, the css was not working
     correctly on some of the pages and I kind of redesign
     some aspects of the original prototype.

Jue 21 Nov
   ★ Presentation!

22 Nov

★ I started the document of react and worked on simple
  things such as the main overview, the navbar and the
  random recipe.

23 Nov
★ I started the document of react and worked on simple
  things such as the main overview, the navbar and the
  random recipe.

24 Nov
★ The document was updated with information such as the
  recipes, the famous chefs at the bottom of the home page
  and the footer that appears in every single page.

25-27 Nov
★ The implementation of the login, the register and the
  logout where implemented. I tried to do the settings
  part but the account was not deleted correctly.
★ The filter of the recipes was implemented correctly, so
  now we can search for specific types of food.

28 Nov
★ ¡Final Presentation!
★ I made some final implementations such as the likes of
  the posts, the page where you can find these liked
  posts, the blog in which the user can either delete
  their post or like community posts and make the delete
  account work.

29 Nov
★ I made some final adjustments to the webpage, mostly css
  relating actions.
  (https://github.com/Fernandamenass/FinalWeb.git)
★ I posted the website on render and now everyone can
  access it. (https://platus-hunger-nolonger.onrender.com)
★ The css was a little problem and the page is not
  responsive
